

LAB #5 – Two- and Three-Dimensional Plots

Purpose:

Learn to make two- and three-dimensional plots in MATLAB.

Before the lab:

Read the course slides and chapters 5 and 10 of the textbook.

During the lab:

1. With MATLAB, finish problems 5 to 7 in the textbook chapter 5 (section 5.14).
2. With MATLAB, finish problems 5 to 7 in the textbook chapter 10 (section 10.6).
3. Select problems 9 , 10, and 15, from chapter 5 of the textbook and finish them with MATLAB.
4. Select problems 17, 20, 21 from chapter 10 of the textbook and finish them with MATLAB.
5. Create a data set of your marks of an assignment from the 5 courses of last semester and plot it on the screen. Please normalize these marks to 100 points full marks.
6. Close MATLAB.

At the end of the lab:

Review the steps you took to perform the various operations in the lab.

Lab Report Submission Requirement:

Please submit your report on the blackboard by the due time.
