Midterm Question 2:

Use **In-Sight 7802 Model** for Emulation. Start a new job. Browse to (or Open) the images in the **Demo Block** folder. There are two images – **Good Part** and **Bad Part**.

Inspection Tasks:

1. Locate the part.
2. Read the 2D code.
3. Read and verify the text string **ABC123**.
4. Measure the width of the part indicated by the **red double-headed arrow**.
5. Inspect the part for the gouge that exists only on the **Bad Part**.
6. Inspect that the part has three holes and that each hole has the correct diameter.
7. Save the job as **MyBlock_YourName.job** and submit it on Blackboard.
