

LAB #6 – Branches and Loops in MATLAB

Purpose:

Advance programming with branches and loops in MATLAB.

Before the lab:

Read the slides and chapter 6 of the textbook.

During the lab:

1. With MATLAB, for problems 8, 11, 13, 15, 18, 25 in the text book (section 6.8).
2. Close MATLAB.
3. **Tracing Exercise:** What will be displayed exactly after the following .m file is executed? (do not use MATLAB for this).

```
n = [1 -88 300 27 -10 17];  
p = n(1);  
for j = 3:length(n),  
    p = p + n(j)  
end  
k = 0;  
tt = 10;  
while k < 15  
    k = k + 3  
    tt = tt + k  
end  
disp (k)  
disp (tt)
```

4. If you have finished the required problems before the end of the lab, try the other problems.
5. Submit the answers of given questions. Submissions are due at the end of the lab session or at least before the end of the day.
